Make it once. Make it Mighton.

Established in 1983, Mighton Products Ltd is a family-owned business based in Hinxton near Cambridge. The company was initially formed by Mike Derham (who started out as a Joiner making timber sash windows) to supply nylon sash pulleys, cord, and sash weights.

Since those early days, the company had added casement window products, door hardware and more recently bifold hardware and a range of high-quality joinery paints and coatings.

Today, the product range stretches to around 3000 items however, timber sash windows remain the company's main passion.

Mighton Products is rapidly expanding and now supply many countries around the world. We are constantly working with leading brands, providing the service and quality they expect from a market leader. But we haven't forgotten our roots so the small joinery shop, decorating business or homeowner all receive the same service.

We know that you want to talk to someone that understands what you are looking for and can advise you where to look. Our knowledgeable team are trained to advise on all of our products and we offer help and advice to make sure you are able to make the right choice.

Steel Sash Weights

Mighton Products developed the steel sash window weight back in 1985 and they have since become the industry preference. Steel sash window weights offer a very cost-effective solution as they are far more competitively priced than lead sash weights. We hold a huge range of weights in stock for next day delivery.

- ✓ Designed by Mighton in 1985.
- ✓ Compatible with the majority of sash windows.
- ✓ Competitively priced compared to lead sash window weights.
- ✓ Compatible with all of our sash cords and connectors.
- ✓ Our online calculator makes it quick and simple to find the weights you need.

Weights are an integral part of any counterbalanced sash window. Source your weights from a firm you can trust.

Lead Sash Weights

Mighton developed the format that lead sash window weights are manufactured to today and our continued focus on the quality and standards of our lead weight range ensures we remain market leading specialists to this day. We stock a wide range of weights, all available for same-day despatch and next day delivery.

- ✓ Suitable for use with cord or chain.
- ✓ Compatible with the majority of sash windows.
- ✓ 10mm diameter thru-hole.
- ✓ Square and round section profiles available.
- ✓ Can be sawn to length/weight using a fine toothed saw.

Source your lead weights from the market-leading specialist supplier. Same day despatch from stock.

1 3/4" & 2" Sash Pulleys

...trusted by the industry

Mighton designed the rivet-less face plates over 30 years ago and it has now become an industry standard, and we were also one of the first to fit ball bearings to the pulley ball race giving a consistent and smooth operation.

Match & Mix

Match any colour, even the big brand names

Our state-of-the-art computerised dispensing systems combine accurate amounts of coloured tints to follow a defined recipe. We hold 1000's of pre-loaded recipes on our digital colour database which match to many popular colours from many systems and brands.

We can load an existing colour recipe in seconds and dispense the perfect mix immediately.

- ✓ Match any colour, in professional grade paint.
- ✓ Water-based, odourless and environmentally friendly.
- ✓ Many of the big name brand colours are supported.
- ✓ RAL, NCS and BS4800 colour range support.
- ✓ Matt, Gloss & Semi-Gloss finishes.
- ✓ Next day delivery available*.
- ✓ Quantities from 2.5L

* UK customers only. If we have your colour recipe, we will mix and dispatch same working day provided the web order is placed before 4.00pm. In the rare case that we don't have your recipe, we can generally create it within one working day, however some recipes are more difficult to create than others, so you should allow up to 3 working days to receive the paint.

Professional Water-based Joinery Paint

They flow and level like traditional solvent based paints, but are eco friendly, exceeding environmental safety regulations. The paints are available in unlimited colours thanks to our unique colour matching service, with a long-lasting high performance you can rely on.

Mighton's paints and coatings dry quickly compared to other similar paints on the market and boast the highest accreditation standard in Europe (KOMO certified standard).

- ✓ Professional grade water-based paint.
- ✓ Very good abrasion and scratch resistance.
- ✓ Great flow for easy application.
- ✓ Very good blocking resistance.
- ✓ Odourless and environmentally friendly.
- ✓ End grain sealers and primers available.
- ✓ Matt, Gloss & Semi-Gloss finishes.
- ✓ Quantities from 2.5L

Window opening control devices

Child window safety is no accident.

It's an unfortunate fact that every year over 4,000 children fall through open windows. Of those, 15-20 are killed and at least 80% are under the age of four. (Source: Home Safety Facts and Figures, RoSPA).

Fitting window opening control devices will reduce this statistic. The Angel Ventlock® is used by some of the world's largest window companies and has been tested to the most stringent International (ASTM F2090) and European (BS EN 14351-1:2006) Standards.

Angel Ventlocks® are available for both sash and casement windows.

Angel surpasses all forced entry tests, allows for egress and automatically resets when the window is closed.

The British Standard states 'Safety restrictors should be fitted to any accessible opening window where children or adults are at risk of falling out'.

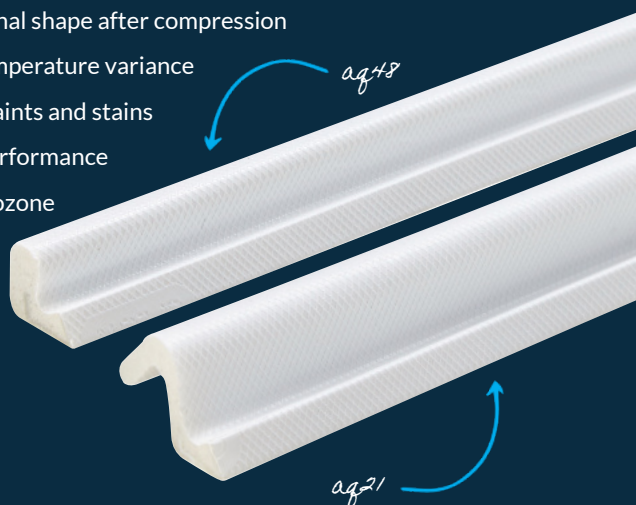

Schlegel Aquamac

The Schlegel Aquamac range is one of the most reliable weatherseal ranges on the market and Mighton is proud to stock genuine Schlegel Aquamac 21, 48 and 63 weatherseals.

- ✓ Excellent memory – Returns to original shape after compression
- ✓ Easily compressed, unaffected by temperature variance
- ✓ Properties unaffected by standard paints and stains
- ✓ Acoustics – Outstanding acoustic performance
- ✓ Unaffected by rot, fungi, UV light or ozone
- ✓ Unrivalled thermal performance
- ✓ Operating range +70°C to -65°C
