

Cord Grippa

Data Sheet

Features

Cord Grippa makes sash cord adjustment simpler and fitting time much faster.

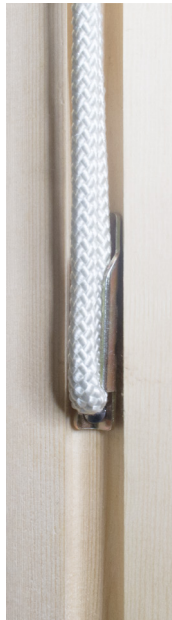

Comes in versions suited to 6mm and 8mm thick sash cords.

Easy to install.

Installation

First insert your first screw in to the sash style, this will be used as a locator.

Locate the Grippa on the screw you have already used.

Push the grippa up fully to ensure it's in the correct place and mark the hole.

Fit the second screw to the previously marked location.

Your sash cord can now be adjusted quickly and easily by pulling down.
