

# Fitch Fastener Locking

## Product Data Sheet

### Slim 10 mm keep for double-glazed meeting rails.

Double glazing can shrink the top meeting rail so far that most fasteners will not fit. The slim keep on this solid brass Fitch fastener is designed to overcome that.

## 1 Key features

- **Solid brass**, plated
- **Slim 10 mm keep** that fits most meeting rails
- Design **pulls the meeting rails together and levels them** when closed
- Locking action helps reduce draughts
- Supplied with key and matching screws
- Also available in non-locking version
- PVD Brass finish available: **PVD (Physical Vapour Deposition)** is a strong, wear-resistant finish with high durability and scratch resistance

## 2 Specification

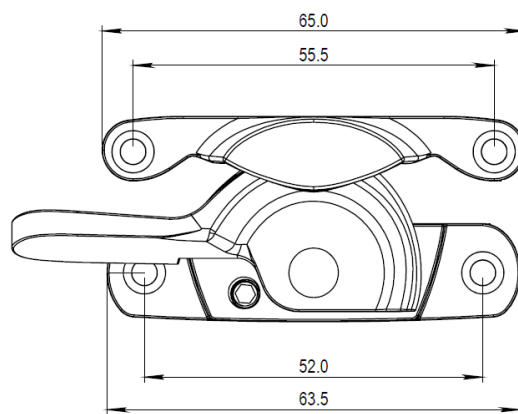

| Item       | Detail                           |
|------------|----------------------------------|
| Product    | Fitch fastener, locking          |

## 4 Dimensions

All dimensions in mm

### Check the dimensions before you order

Review the dimensions shown to make sure this fastener will fit your meeting rails.

## 5 Finishes and product codes

| Finish          | Product code | Finish            | Product code |
|-----------------|--------------|-------------------|--------------|
| Lacquered Brass | SBLFF        | Polished Chrome   | SBLFFCH      |
| Antique Brass   | SBLFFABR     | Satin Chrome      | SBLFFSC      |
| Satin Brass     | SBLFFSB      | Oil Rubbed Bronze | SBLFFORB     |
| Antique Pewter  | SBLFFAP      | PVD Brass         | SBLFFPVD     |

### Lacquered Brass will tarnish

Lacquered Brass is **polished and lacquered**, not plated. Lacquer can hinder tarnishing, but with handling it will eventually tarnish and take on an authentic 'used' look.
