

Fitch Fastener Locking

Product Data Sheet

Slim 10 mm keep for double-glazed meeting rails.

Double glazing can shrink the top meeting rail so far that most fasteners will not fit. The slim keep on this solid brass Fitch fastener is designed to overcome that.

Important: fitting position

We recommend that you **dry-fit by taping the fastener and keep in position before drilling**, to ensure the product works with your meeting rail and draughtproofing combination. Fit this fastener with a hole-centre spacing of **16.0 mm**. Once fitted, it will retract the sashes by approximately **3.0 mm** and give lift of approximately **2.75 mm**, depending on the stiffness of your meeting rail draughtproofing. **The tops of the meeting rails should be level when the fastener and keep are fully engaged.**

1 Key features

- Solid brass, plated
- Slim 10 mm keep that fits most meeting rails
- Design **pulls the meeting rails together and levels them** when closed
- Fastening action helps reduce draughts
- Supplied with key and matching screws
- Also available in non-locking version
- PVD Brass finish available: **PVD (Physical Vapour Deposition)** is a strong, wear-resistant finish with high durability and scratch resistance

2 Specification

Item	Detail
Product	Fitch fastener, locking
Material	Solid brass, plated
Keep width	10 mm
Fixings	Key and matching screws supplied
Use	Sash window meeting rails

4 Dimensions

All dimensions in mm

Check the dimensions before you order to make sure this fastener will fit your meeting rails.

5 Finishes and product codes

Finish	Product code	Finish	Product code
Lacquered Brass	SBLFF	Polished Chrome	SBLFFCH
Antique Brass	SBLFFABR	Satin Chrome	SBLFFSC
Satin Brass	SBLFFSB	Oil Rubbed Bronze	SBLFFORB
Antique Pewter	SBLFFAP	PVD Brass	SBLFFPVD

Lacquered Brass will tarnish

Lacquered Brass is **polished and lacquered**, not plated. Lacquer can hinder tarnishing, but with handling it will eventually tarnish and take on an authentic 'used' look.
