# Make it Once. Make it Mighton.

Established in 1983, Mighton Products Ltd is a family-owned business based in Hinxton near Cambridge. The company was initially formed by Mike Derham (who started out as a Joiner making timber sash windows) to supply nylon sash pulleys, cord, and sash weights.

Since those early days, the company had added casement window products, door hardware and more recently bifold hardware and a range of high-quality joinery paints and coatings.

**Today, the product range stretches to around 3000 items however, timber sash windows remain the company's main passion.**

Mighton Products is rapidly expanding and now supply many countries around the world. We are constantly working with leading brands, providing the service and quality they expect from a market leader. But we haven't forgotten our roots so the small joinery shop, decorating business or homeowner all receive the same service.

We know that you want to talk to someone that understands what you are looking for and can advise you where to look. Our knowledgeable team are trained to advise on all of our products and we offer help and advice to make sure you are able to make the right choice.

PVD Brass

Heritage Fastener

# Get to know our 9 colour range

Premium finishes designed not only to complete your interior look, but to provide a durable and long lasting coating.

## **PVD Brass**

Solid brass which is highly polished and PVD coated to give a bright gold-like corrosion resistant finish.

## **Laquered Brass**

Solid brass, polished and lacquered to give a subtle matt finish.

## **Satin Brass**

Solid brass, lightly grained and lacquered to give a beautiful satin finish.

## **Antique Brass**

Solid brass, plated with copper, nickel, chrome and a final burnish layer which is partially removed giving a subtle contrasting effect.

## **Polished Chrome**

Solid brass, with a copper plated layer followed by nickel and finally chrome to give a highly polished finish.

## **Satin Chrome**

Solid brass with a copper electro-plated base, followed by nickel and drawn chromium to give a beautiful satin finish

## **Antique Pewter**

Solid brass plated with copper, nickel, chrome and a darker burnished layer then buffed to give an antiqued effect.

## **PVD Satin Black**

Solid brass which is PVD coated to give a dark brass-like corrosion resistant finish.

## **Oil Rubbed Bronze (ORB)**

Solid brass, plated with copper, nickel, chrome and finally a black-coloured burnish layer that's partially giving a beautiful edging effect.
